

## Bluetooth 2-in-1 Audio Receiver and Transmitter Adapter

Model: INT-BTRxTx100

# Product Diagram and Parts

## Adapter Components

1. LED Indicator Light
2. Multi-function Button: Power/Play/Pause
3. 3.5 Mini Jack: Audio Output/Input
4. Mini USB Input (for charging only)
5. Receive (RX) / Transmit (TX) Switch

## Included Cables

6. 3' 3.5 mini to 3.5 mini cable (not shown)
7. USB charging cable (not shown)
8. 3.5 mini to RCA left/right Y-cable (not shown)

## Specifications

- Bluetooth Version: 2.1 +EDR
- Frequency Range: 2.4 GHz
- Output Power Category: Class 2
- Bluetooth Mode: A2DP/AVRCP
- Bluetooth Range: Up to 30 feet
- Electric Voltage: DC 3.7v
- Working Current: DC 3.7v/38mA (Max)
- Charge Voltage: DC 5.0v
- Charge Current: DC 5v/130mA (Max)

## Operation

---

### Receiver Mode

Use the *Receiver mode* (RX) to turn your headphones, car radio, home stereo system, or amplified speaker into a Bluetooth enabled device.

# Receiver Mode Usage Instructions

1. Turn the adapter's Transmit/Receive switch to the "RX" position.
2. Press and hold the adapter's multi-function button. The device will power on.
3. Continue to hold the button until the LED pulses red/blue quickly indicating it's in pairing mode.
4. Open the Bluetooth function on your mobile device.
5. Search for the Bluetooth device "INT-BTRxTx100" and *connect* to it.
6. Enter the code "0000" if needed.
7. Once pairing is successful, the LED will stay blue.
8. Connect the adapter to your wired headphones, or car radio, home stereo , or amplified speaker using the 3.5 mini to 3.5 mini audio cable.
9. Play the audio on your mobile device and enjoy.
10. Turn off the adapter by long pressing the multi-function button until the LED turns off.

### **Notes:**

- Once you have successfully paired your mobile device the first time, subsequent times will reconnect automatically.
- Your phone will not pair while another device is connected to the adapter.
- To use the adapter with your car stereo, be sure to switch to the audio input on your stereo to *AUX*.
- If you want to switch to the *Transmit* (TX) mode, you must power the adapter OFF first.

## Transmitter Mode

Use the Transmitter mode to listen to your TV, radio/receiver, or any other A/V device wirelessly using a Bluetooth headset or Bluetooth speaker.

### Transmitter Mode Usage Instructions

1. Turn the adapter's Transmit/Receive switch to the "TX" position.

2. Connect the 3.5 mini audio cable from the *audio output* port of your Bluetooth (BT) media device to the *audio input* port of the adapter.
3. Press and hold the adapter's multi-function button. The device will power on.
4. Continue to hold the button until the LED pulses blue quickly indicating it's in pairing mode.
5. Refer to your BT media device pairing instructions to proceed with the pairing.
6. Once the pairing is successful the LED will stay blue.
7. Turn off the adapter by long pressing the multi-function button until the LED turns off.

**Note:**

- When the adapter is out of range, it will disconnect and will reconnect when it is back in range.
- When the adapter is in low power state, it will produce an alarm and power off (below 3 volts.)
- You can charge the adapter while it is in use. The LED will be red while charging.
- The adapter will power off after continued non-use even if the USB cable is connected.
